What is a CTF

CTF (Capture The Flag) is a kind of information security competition that challenges contestants to solve a variety of tasks ranging from a scavenger hunt on wikipedia to basic programming exercises, to hacking your way into a server to steal data.

CTF

Advances of CTF

Advantages of CTF

Hands on Skills

All The Participants Gain Hand on Skills of Cyber Security and Pentesting. Which make them a Useful resource for the society

Teamwork

Participants Will be Grouped together into different teams. Through Which They will learn about Teamwork. Which Will help them in their Professional Life

Competence

Hand on Skills Make Every Single Participant a Competent Person .IT will give them confidence. They know how much they have learnt and practiced .

Our Requirements

- Lab to establish the CTF
- Posters
- Official Announcement of CTF
- Official Announcement of Winners
- Teachers Guidance
- Fall of Fame Wall for Winners

Our Goals

Create CTF Players

We Want to Create National Hackathon Players, You will participate in the National Hackathon 2022 this Year .Also, we will want them to participate in the international Hackathons as well

Create Cyber Experts

We want to create as many cyber experts as we can through their proper training so that they can give back to the community and stable themselves
